

**SYSTEMS AND METHODS FOR IMPLEMENTING A CONTENT
OBJECT ACCESS POINT**

ABSTRACT OF THE DISCLOSURE

- 5 **[0052]** Systems and methods for accessing and distributing content objects. Various of the systems and methods utilize a number of content object entities that can be sources and/or destinations for content objects. A combination of abstraction and distinction engines can be used to access content objects from a source of content objects, format and/or modify the content objects, and redistribute the modified content object to one or more content object
- 10 destinations. In some cases, an access point is included that identifies a number of available content objects, and identifies one or more content object destinations to which the respective content objects can be directed.
